~~X~~
Disregarding national defense allowed North Korea to grow dangerous.

~~X~~ Tax increase and pork-barrel politics hurt Japan.

Protect our country by ourselves.

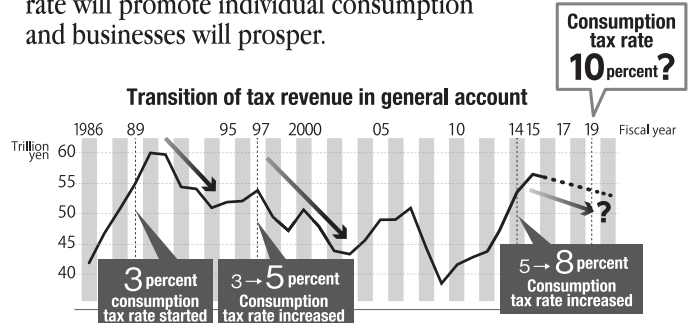

- Promote nuclear shelters.
- Enforce deterrence by increasing volume of defense equipment.
- Abolish three non-nuclear principles.
- Exclude North Korea from being covered under Article 9 of the Constitution.*

*Remove North Korea from "peace-loving peoples," which is stipulated in the preamble of the Constitution.

Reduce consumption tax rate to 5 percent.

Increasing consumption tax rate will worsen earnings of companies, which will lead to decreasing salaries, meaning total tax revenue will decrease. Decreasing consumption tax rate will promote individual consumption and businesses will prosper.

Made by Happiness Realization Party based on the data "transition of tax revenue in general account" from Ministry of Finance website.

Clean politics with brave decisions.
